

PSC04 / PSC05 INTERFACE

The PSC04 (one way interface) and PSC05 (two-way interface) are intended for use by developers who want to develop products that transmit and receive X-10 protocols. A relatively high level of programming knowledge is required to develop products that use these interfaces.

If you are an end user who has purchased this product to work with a product that was designed to use it, please refer to the owner's manual for that product for operating instructions.

If you are a developer who has purchased this interface to develop an X-10 compatible product, you will need the PSC04/PSC05 Tech Note which gives you all the information you need to be able to "talk to the interface."

Please either contact X-10 at the address below and we will send you a FREE copy of the 12 page Tech Note, or visit our WEB site at www.x10pro-usa.com for more information.

We do not include a copy of the Tech Note with every interface we ship, because developers only need one copy and end users do not need it.

If you are an end user and have misunderstood what this product is for, and how it is used, we will be happy to refund your purchase price (if you purchased the product directly from X10 PRO-USA). If you purchased the product from somewhere else please contact your dealer or distributor.
