

## Remote Siren, Model PSH02

### Installation Instructions

1. Set the Housecode dial on the PSH02 to the same letter as your SC1200 security system, and to the same number as it's security code.
2. If you want to control the PSH02 from other types of X10 controllers, set the Unit Code dial on the PSH02 to any unused number between 1 & 16.
3. Plug the PSH02 into any unused AC outlet (not one that is controlled by a wall switch, in case the switch accidentally gets turned off).

### Operating Instructions

#### WARNING:

**The PSH02 is extremely loud. To avoid permanent hearing damage, do not stand too close to it when you trip the alarm.**

1. To test the PSH02, trip your alarm system. The PSH02 will sound for as long as the alarm in the security system console sounds, and then shut off a few seconds after you disarm the alarm.
2. To trip the PSH02 from any X10 controller (if you hear a strange noise at night, for example): Press Unit Code-ON, then Unit Code-OFF, then Unit Code-ON, repeatedly. The PSH02 will sound for as long as you keep pressing ON and OFF and will stop a few seconds after you stop pressing buttons. Or press Unit Code-ON and hold the button pressed for a few seconds. Or press All Lights On, then All Units Off, repeatedly.
3. You can use the PSH02 as an annunciator: Press Unit Code-ON, on any X10 Controller and then press Dim or Bright. You will hear a ding or a dong for each button press.
