

## Remote Siren, Model SH10A

### Installation Instructions

1. Set the Housecode dial on the SH10A to the same letter as your SC1200 security system, and to the same number as it's security code.
2. If you want to control the SH10A from other types of X10 controllers, set the Unit Code dial on the SH10A to any unused number between 1 & 16.
3. Plug the SH10A into any unused AC outlet (not one that is controlled by a wall switch, in case the switch accidentally gets turned off).

### Operating Instructions

#### WARNING:

**The SH10A is extremely loud. To avoid permanent hearing damage, do not stand too close to it when you trip the alarm.**

1. To test the SH10A, trip your alarm system. The SH10A will sound for as long as the alarm in the security system console sounds, and then shut off a few seconds after you disarm the alarm.
2. To trip the SH10A from any X10 controller (if you hear a strange noise at night, for example): Press Unit Code-ON, then Unit Code-OFF, then Unit Code-ON, repeatedly. The SH10A will sound for as long as you keep pressing ON and OFF and will stop a few seconds after you stop pressing buttons. Or press Unit Code-ON and hold the button pressed for a few seconds. Or press All Lights On, then All Units Off, repeatedly.
3. You can use the SH10A as an annunciator: Press Unit Code-ON, on any X10 Controller and then press Dim or Bright. You will hear a ding or a dong for each button press.
